How to make your own "Very Hungry Caterpillar" puppet- by Kathy Ross

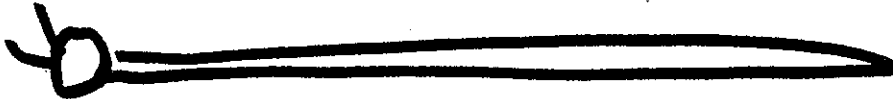

1. Fold the red pipe cleaner in half.

2. Fold the two ends of the pipe cleaner up to make antennae.

3. Thread the red bead over the folded end of the pipe cleaner to the antennae to make the head.

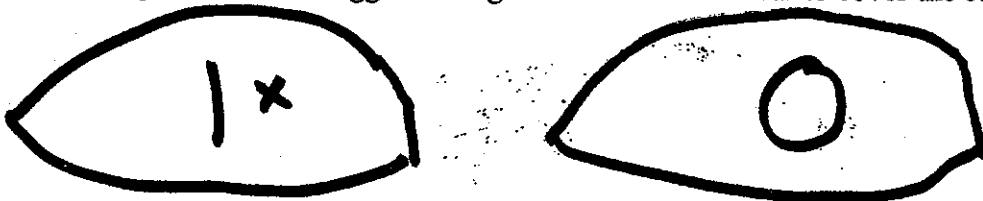

4. Thread the seven green beads on the pipe cleaner to make the body. Bend the body to arch it.

5. Glue the two tiny wiggle eyes to the head.

6. Glue the edge of the white egg to the right of the cut in the leaf to cover the cut.

7. Slip the head of the caterpillar in the cut under the egg from the bottom side of the leaf. Push the pipe cleaner end of the caterpillar to make it "pop" out of the egg.
